

H7 - Guide

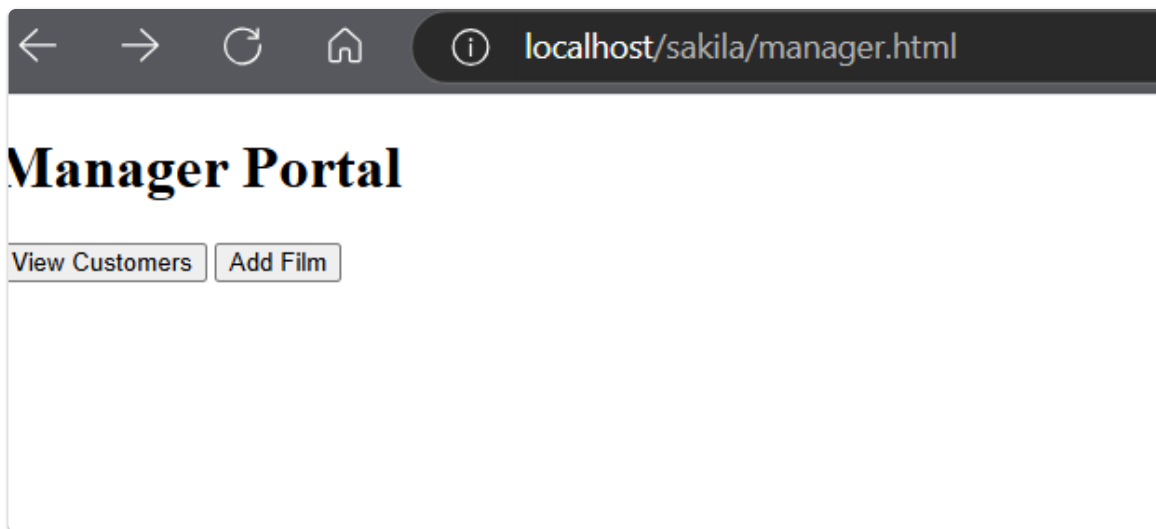

Just a Guide so it's easier for y'all to make the video and pdf

Assignment was pretty straight forward I tested it and it works for me I just hate making the videos. Just take a look through the code so you understand!

Put linked sakila folder in "htdocs" folder that's within your xampp folder
(Turn on Apache and MySQL in Xampp control panel before)

Then click on the manager.html inside and let it open in whatever browser you prefer (I used Microsoft edge) It should work from there. You should already have access to the "sakila" db because of the last assignments. If not go back to the instructions of the last couple and download it.

Some Screenshots to help

Add a New Film

Title:

Description:

This movie is the testyiest test movie Ive ever seen
